†The figures on fuel consumptions and CO₂ emissions shown are determined according to the European Regulation (EC) 715/2007 in the version applicable at the time of type approval. Figures are intended for comparability purposes. The fuel consumption you achieve under real life driving conditions and CO₂ produced will depend upon a number of factors including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load.

The figures are based on the new test (WLTP) and are translated back into outgoing test (NEDC) in order to ensure a comparison between the vehicles.

FUEL CONSUMPTION†

Urban	23.3-22.8 ltr/100 km / 12.1-12.4 mpg (Imp.)
Extra urban	12.6-12.0 ltr/100 km / 22.4-23.5 mpg (Imp.)
Combined consumption	16.2-16.0 ltr/100 km / 17.4-17.7 mpg (Imp.)
CO ₂ emissions (combined)	370-365 g/km

CO₂ EMISSIONS FIGURE (g/km)

For the assessment of taxes or other duties based on CO₂-emissions, the CO₂ figures may differ to the figures stated here. The figures shown consider optional equipment and the different size of wheels and tyres available on the selected model and may vary during the configuration.

Further information about the official fuel consumption and the specific CO₂ emission of new passenger cars is available in a guide available at all selling points and at <http://carfueldata.direct.gov.uk/in> in the United Kingdom, at <http://www.dat.de/angebote/verlagsprodukte/leitfaden-kraftstoffverbrauch.html> in Germany or an equivalent guide published by your local government authority.
