\*Manufacturer's test results. Actual acceleration results may vary depending on specifications of the vehicle, road and environmental conditions, testing procedures and driving styles. These results should be used for comparison only and verification should not be attempted on public roads.

†The figures on fuel consumptions and CO<sub>2</sub> emissions shown are determined according to the European Regulation (EC) 715/2007 in the version applicable at the time of type approval. Figures are intended for comparability purposes. The fuel consumption you achieve under real life driving conditions and CO<sub>2</sub> produced will depend upon a number of factors including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load.

### FUEL CONSUMPTION (USA AND CANADA)‡

City (USA)	13 mpg
Highway (USA)	21 mpg
City (Canada)	16.9 ltr/100 km
Highway (Canada)	10 ltr/100 km

### CO<sub>2</sub> EMISSIONS FIGURE (g/km)

The figures are based on the new test (WLTP) and are translated back into outgoing test (NEDC) in order to ensure a comparison between the vehicles.

For the assessment of taxes or other duties based on CO<sub>2</sub>-emissions, the CO<sub>2</sub> figures may differ to the figures stated here. The figures shown consider optional equipment and the different size of wheels and tyres available on the selected model and may vary during the configuration.

Further information about the official fuel consumption and the specific CO<sub>2</sub> emission of new passenger cars is available in a guide available at all selling points and at <http://carfueldata.direct.gov.uk> in the United Kingdom, at <http://www.dat.de/angebot/verlagsprodukte/leitfaden-kraftstoffverbrauch.html> in Germany or an equivalent guide published by your local government authority.

‡EPA (Preliminary) – Use estimated mpg for comparison with other cars. Your mileage may vary with options, driving conditions, driving habits, the car's condition, speed and trip length. Actual highway mileage will probably be less. The fuel efficiency data was determined using approved Transport Canada Test Methods.
