\* Manufacturer's test results. Actual acceleration results may vary depending on specifications of the vehicle, road and environmental conditions, testing procedures and driving styles. These results should be used for comparison only and verification should not be attempted on public roads.

† Fuel consumption is determined in accordance with the ECE driving cycle, made up of approximately one-third urban traffic and two-thirds extra-urban driving (based on the distance covered). CO<sub>2</sub> emissions are measured in addition to fuel consumption. Fuel consumption and CO<sub>2</sub> emission figures are dependent on tyre format. Further information on

the official fuel consumption and on the official specific CO<sub>2</sub> emissions of new automobiles can be found in the guidelines on fuel consumption and CO<sub>2</sub> emissions of new automobiles at <http://carfueldata.direct.gov.uk/>,

‡ EPA (Preliminary) – Use estimated mpg for comparison with other cars. Your mileage may vary with options, driving conditions, driving habits, the car's condition, speed and trip length. Actual highway mileage will probably be less. The fuel efficiency data was determined using approved Transport Canada Test Methods.
