* The engine is designed for Octane grade 95 fuel; however, it may be run on fuel with a minimum Octane grade of 91.
† Manufacturer’s test results. Actual acceleration results may vary depending on specifications of the vehicle, road and environmental conditions, testing procedures and driving styles. These results should be used for comparison only and verification should not be attempted on public roads.
‡ Fuel consumption is determined in accordance with the ECE driving cycle, made up of approximately one-third urban traffic and two-thirds extra-urban driving (based on the distance covered). CO₂ emissions are measured in addition to fuel consumption. Fuel consumption and CO₂ emission figures are dependent on tyre format. Further information on the official fuel consumption and on the official specific CO₂ emissions of new automobiles can be found in the guidelines on fuel consumption and CO₂ emissions of new automobiles at [http://carfueldata.direct.gov.uk/](http://carfueldata.direct.gov.uk/), [http://www.dat.de/en/offers/publications/guideline-for-fuel-consumption.html](http://www.dat.de/en/offers/publications/guideline-for-fuel-consumption.html) or your local government authority.
