# ROLLS-ROYCE CONNECT HOW-TO GUIDE: WI-FI HOTSPOT

# ROLLS-ROYCE WI-FI HOTSPOT OVERVIEW

## 5 steps to an effortless browsing experience

### **The Rolls-Royce Wi-Fi Hotspot offers the following services:**

Always on – the Internet makes life easier, not only at home and in the office, but also, and in particular, when you are on the move.

Reliable, secure and fast - this is precisely what the Rolls-Royce Wi-Fi Hotspot delivers

### **Accessing the Rolls-Royce Wi-Fi Hotspot:**

1. Vehicles need to be fitted with option Wi-Fi Hotspot (SA-6WD). Wi-Fi Hotspot is standard since MY18 in most European markets.
2. In the Vehicle: The customers connect their device to the Wi-Fi by entering the security code generated by the car.
3. The customer will be redirected to the HotSpot Drive website.
4. Initially, the customer must register.
5. The customer must purchase an access data package, either “Hotspot Drive Comfort” or “Hotspot Drive Premium” and then selects their method of payment and starts using the service.

# ACTIVATING THE ROLLS-ROYCE WI-FI HOTSPOT

1.

Select “Applications” in your control display.

2.

Select “Mange mobile devices”

5.

Your Internet hotspot has now been activated and you can connect your mobile device to it. You have a two-minute window in which to do so. Naturally, each device only needs to be registered once – just like at home.

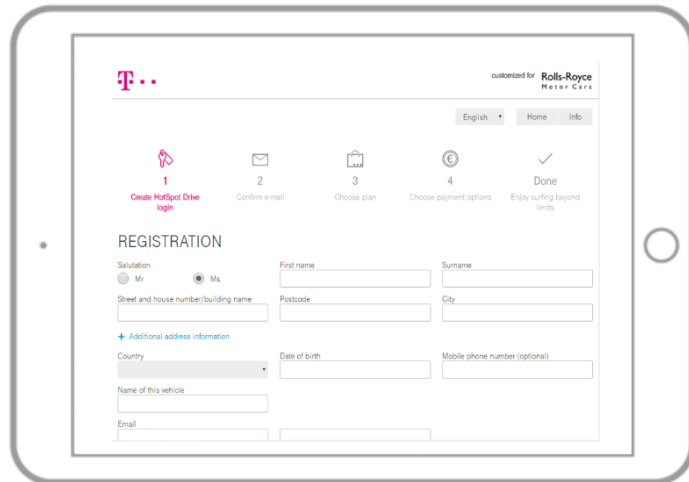

# REGISTRATION FOR DEUTSCHE TELEKOM HOTSPOT DRIVE

1.

Once you have activated the Internet hotspot in your vehicle open the browser on your mobile device. The first time you use the hotspot, you will be automatically redirected to the HotSpot Drive home page (<https://www.rrmc.hotspotdrive.com>)

2.

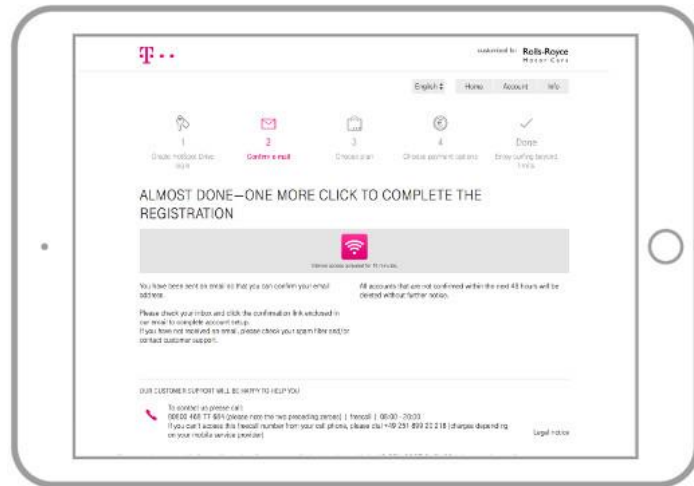

Enter your personal information to create a customer account.

**Information:** address, vehicle home country (Business Unit) and current location must match the same country.
